Video Views and other objectives are influenced by various external factors, including placement, topic, audience behavior, platform algorithms, and content relevance. As a result, we cannot guarantee specific Reach or other objectives numbers; our estimates are based on previous experiences and trends.

Special Remarks

- Sinhala is not a supported language on Google Ads therefore, there is a possibility that ads using Sinhala may be rejected by the platform.
- Also we recommend running one main video on YT throughout the campaign period to get the top of the mind awareness by maintain the message consistency
- For the YouTube outreach boosting, we recommend using the 5 sec and 15 sec versions of the Ritzbury Deckers TVC.
- 5 sec bumper ad will help maximize reach and frequency, allowing the brand message to be delivered quickly to a wider audience. The 15 sec version can be used to provide slightly more storytelling while maintaining strong viewer retention, making it effective for engagement during the outreach phase.Using these two durations together will help achieve high reach while reinforcing brand recall across the target audience.
